Credit Name: 2nd programming language

Assignment Name:Eggs

Error Log Entry

What error message did you encounter (if any)?

I did have an Error message because of a leak in the code i didnt notice

What unexpected behavior did your program exhibit?

When i fisrt calculated the extra eggs it came out as a very long incorrect decimal

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

it was a logic error

Include a screenshot of specific lines of code.

How did you fix the issue?

I made a new variable for the extra eggs and calulated it with how many eggs with user entered, to seperate dozens from extras

Provide the corrected code or solution using a screenshot.

```
    double pricePerExtraEgg = pricePerDozen / 12.0;

 //calculating the total
    total = (dozens * pricePerDozen) + (extraEggs * pricePerExtraEgg);
```
